

Depending to the requirements 4 different memory modes can be selected by the operator

In **mode S**, it is possible to save up to 255 measuring periodes. Each measuring periode contains average value (AVG), last value (Last), maximum value (MAX), minimum value (MIN), minimum peak value (MINPEAK) and maximum peak value (MAXPEAK). Individual readings are not saved.

MAXPEAK	27.7	MAXPEAK	17.2	MAXPEAK	17.9	
MINPEAK	9.1	MINPEAK	10.4	MINPEAK	10.3	

In **mode L**, it is possible to save up to 255 measuring periodes. Each measuring periode contains average value (AVG), last value (Last), maximum value (MAX), minimum value (MIN), minimum peak value (MINPEAK) and maximum peak value (MAXPEAK). There can be saved 10 readings per measuring periode.

Mode F is the same as mode C, however the sampling rate is faster

In **mode C**, it is possible to save up to 255 measuring periods. Each measuring periode contains average value (AVG), last value (Last), maximum value (MAX), minimum value (MIN), minimum peak value (MINPEAK) and maximum peak value (MAXPEAK). There can be saved up to 4000 readings, splitted up into maximal 255 measuring periodes.
