

# Ultra-reliable MECHANICAL TENSION METERS

## DX2 Series

10 ranges, 5–50 g to 5–20 Kg

A precise jeweled movement, choice of ball bearing mounted rollers and rugged cast aluminum housing makes the DX2 ideal for the toughest production floor application.

Built-in mounting holes permit fixed installation for continuous in-line use.

## FEATURES

- Thumb-operated, roller-shifting mechanism and exclusive snare-guide automatically guides the moving filament into the V-grooves eliminating breaks and snags.
- Front filament loading permits the operator to observe running material, rollers and dial face at all times.
- DX2's are individually calibrated for highest accuracy.
- DX2's hard-coated aluminum, V-grooved rollers are rated for speeds up to 2000 m/min or, optionally, up to 5000 m/min.
- Built-in material thickness compensator maximizes accuracy when using filaments of different diameters.\*
- NIST calibration available.

*Model DXL-5K with 250 mm spacing between outer rollers.*

## Options

### Air Damping (A)

An adjustable, precision air dashpot provides steady tension readings as tensions fluctuate.

### Lever (L)

A heavy-duty, lever-operated mechanism moves the outer rollers for easy acquisition of the running filament. Recommended for models of 10 Kg or higher.

### Memory Pointer (M)

Designed to retain the peak tension value as tensions fluctuate. Manually reset by using the knob located in the center of the dial.

### High Speed Bearings (K)

Rated for speeds up to 3500 m/min.

### Ultra High Speed Roller Assembly (HS)

Rated for speeds up to 5000 m/min.
